

## RG ALUMINIUM OXIDE flap wheels on 6mm-shaft

### Description:

Aluminium oxide flaps and X-Flex weight backing. 6-mm diameter cylindrical shaft.

### Main features and benefits:

These wheels are our most versatile RG tools. Robust and suitable for numerous applications on work surfaces of various kinds. Excellent flexibility.

### Recommended applications:

Finishing, light deburring, cleaning or preparation for subsequent treatments (chromium plating, nickel plating or painting) on small or hard-to-reach surfaces such as the internal surfaces of pipes, cylinders, parts of irregular shape.

### Work surfaces:

Stainless steel, standard steel, alloyed steel, aluminium, titanium, nonferrous materials and alloys, plastic materials, glass fibre, rubber, marble, stone, concrete, wood, hide or leather
